

Sarvajanik Education Society

Sarvajanik College of Engineering & Technology Dr. R. K. Desai Marg, Opp.Mission Hospital, Athwalines, Surat-395001 Report for a Workshop on

"Practical DevOps: From Git Basics to CI/CD Pipeline"

Organized by

Department of Information Technology and Department of Artificial Intelligence and Data Science

On

10th October 2025

Faculty Co-ordinators:

Prof. Palak Desai Prof. (Dr.) Vibha Patel

Student Co-ordinators:

BhavyaBavisi (Final year, AI&DS)
Prapti Mehta (Final year, AI&DS)
Krishna Shethna (Pre-final year, AI&DS)
Het Salmawala (Pre-final year, AI&DS)

Prof.(Dr.) Dhruti Sharma **Department in-charge, Department of AI&DS, SCET**

Prof. (Dr.) Vivaksha Jariwala **HoD, Department of IT, SCET**

About the Workshop:

Title of the	One-Day Hands-on Workshop on "Practical DevOps: From				
Workshop	Git Basics to CI/CD Pipelines"				
Date	10 th October 2025				
Time	1:30 PM to 4:30 PM				
Venue	IT Phase 5 and 6 Laboratory, SCET				
Organized by	Department of Information Technology,				
	Department of Artificial Intelligence and Data Science, SCET				
Objective of the workshop	To provide participants with practical exposure to DevOps concepts and tools, focusing on the fundamentals of Git, GitHub, and CI/CD pipelines. It aimed to help students understand the importance of version control, collaborative development, and automated deployment in modern software engineering practices. The session encouraged participants to build a strong GitHub profile and gain hands-on experience with real-time DevOps workflows to bridge the gap between academic learning and industry requirements.				
Resource Person	Mr. Parth Shah,				
	Lead Software Development Engineer at mavQ				
	mavQ is an AI-powered, low-code automation platform that				
	helps organizations manage, process, and analyze complex content and workflows. Headquartered in New York, it also has a growing presence in India, supporting global clients across government, healthcare, and enterprise sectors.				
Topics Covered	1. Git commands essentials				
	2. How to build strong GitHub profile				
	3. How to deploy project				
	4. Understand CI/CD pipeline				
m . 15	5. Discover the importance of Git in industry				
Total Participants	50				

Workshop Details:

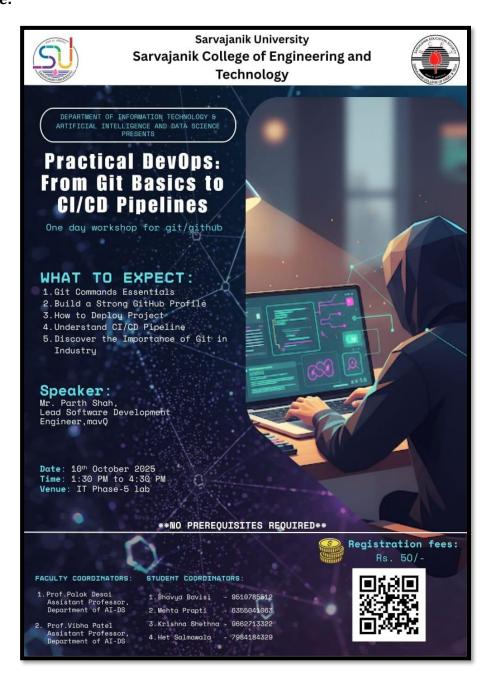

The one-day hands-on workshop was designed to provide participants with practical exposure to core DevOps tools and practices. The session began with an introduction to essential Git commands, enabling students to perform version control operations such as initializing repositories, committing changes, branching, and merging code efficiently. This foundational understanding helped them grasp the importance of maintaining clean and organized project workflows.

Participants then learned how to build a strong GitHub profile by showcasing their academic and personal projects, contributing to open-source repositories, and maintaining a professional online presence. The session further guided them through the process of

deploying projects, where students explored basic deployment methods and understood how continuous delivery ensures faster and more reliable software releases.

The workshop also offered a detailed explanation of the CI/CD pipeline, demonstrating how automation in build, test, and deployment stages enhances productivity and minimizes human error. Through hands-on activities, students discovered the real-world significance of Git and DevOps practices in modern software engineering, gaining insights into how these tools streamline collaboration and accelerate development in industry environments.

Feedback:

The participants shared highly positive feedback about the One-Day Hands-on Workshop on "Practical DevOps: From Git Basics to CI/CD Pipelines". They appreciated the interactive and practical approach, especially the live demonstrations on Git commands, GitHub usage, and CI/CD deployment.

Many found the session engaging, informative, and well-structured, while a few suggested covering more advanced Git commands and allowing slightly more time for hands-on practice. Overall, the workshop was considered a valuable learning experience that enhanced students' understanding of real-world DevOps workflows.

Conclusion:

The workshop concluded successfully with enthusiastic participation and positive feedback from the attendees. It effectively enhanced students' practical understanding of DevOps tools and workflows, particularly in Git, GitHub, and CI/CD pipelines. The session achieved its objective of bridging theoretical knowledge with real-world application, encouraging students to further explore DevOps practices in their academic and professional projects.
